

Meeting Notes — VirtuWorks (June–August 2025)

June 14 — DevOps / HR sync

- Discussed automation of onboarding. HR portal script still failing Python 3.12 (outdated module?).
- Mentioned new RAG-based resume parser but incomplete — “accuracy only 62%”.
- HR asked if AI outputs can be stored; compliance unsure (GDPR vs PDPA).
- Someone said policy doc (v2.2 vs v2.3) mismatch on contractor renewal clause.

June 28 — General Staff

- CEO spoke about “AI everywhere” vision — automate internal knowledge retrieval.
- Complaints that VirtuAI HR assistant “keeps answering from old PDF”.
- Action: Update vector DB weekly, maybe add reranker layer (DevOps owner?).
- Office relocation planned August, email draft pending comms team.

July 19 — Product & HR

Messy discussion:

“The leave policy still says 14 days, but staff >3 years get 18?”

“Recruitment freeze? but we still post Data Scientist role?”

“We should unify VirtuWorks_Job_Postings_Text.pdf with HR policy index.”

August 5 — HR / Legal check

- Contract templates outdated (wrong address: Tower 1, not Tower 2).
- Discussion drifted into product roadmap: RAG QA bot demo, Flowise workflow, data cleaning backlog.
- No one took minutes properly; half notes reconstructed from chat export.

Summary (partial, unverified):

- * Resume parsing automation → test ongoing
- * RAG QA bot → pending evaluation
- * Leave days confusion → unresolved
- * Policy doc version conflicts → unresolved
